

COURSE DESCRIPTION

To provide an overview and an understanding of the changes to electrical standards with the release of AS3000:2018.

COURSE CONTENT

This Wiring Rules Update Course summarises distinctive changes in the latest version of the AS/NZS 3000 Wiring Rules.

This course is design to highlight the main points in an overview and discussion format.

The Wiring Rules Preface contains outlines of most of the changes updated in this version. Throughout the Standard, most changes are highlighted with an (*) in the margin.

The 2018 edition of the Australian/New Zealand wiring rules supersedes the 2007 version.

While much of the previous standard remains unchanged, significant changes have been made due to;

- a. New technology, new equipment and improved installation techniques
- b. Industry feedback regarding readability and compliance
- c. Identification and clarification of mandatory requirements and informative guidance material
- d. Experience gained in the application of the previous edition

This course will no means cover every change that has taken place but more bring to the forefront the main changes that have taken place within the new standard.

COURSE REQUIREMENTS

Copy of AS/NZS 3000:2018

Notepad

Pen

COURSE OUTCOMES

On completion of training the participants will receive a statement of attendance.

ENTRY REQUIREMENTS

No entry requirements exist.

DELIVERY METHOD

Face to Face theory based course delivered in a classroom.

DURATION

4 hours

MAX STUDENTS

20

There are currently no dates available for this course.
